

Certified AI PRACTITIONER™

Artificial Intelligence (AI) and Machine Learning (ML)

have become an essential part of the toolset for data-driven organizations. When used effectively, AI/ML drives organizations to innovate and excel. Certified AI Practitioner (CAIP) equips you with a vendor-neutral, cross-industry knowledge of AI and ML concepts and skills, enabling you to propel your data career from analyst to AI practitioner.

Machine Learning
Engineer is #4 on
'2022 LinkedIn Jobs
On The Rise' list

“100% of any company’s
future success depends on
adopting Machine Learning.”

(Brandon Purcell, VP, Principal Analyst at Forrester Research)

AUDIENCE

CAIP is designed for data practitioners who are seeking to develop an AI skillset that will enable them to select, train, and implement ML models. Common job roles include the following:

- Machine Learning Scientist
- Machine Learning Engineer
- AI Developer
- Data Scientist
- Data Engineer
- Applied Scientist
- Senior Data Analyst
- Director of Business Intelligence

READINESS ASSESSMENT

Measure your organization's
